

## Work examples

With over 40 years experience and an International reputation of the highest order, you can pretty much count on the fact that John Pipe International can pack and forward virtually anything to any destination in the world. No matter how delicate, no matter what size or weight, no matter where the destination, John Pipe International is a specialist in getting your cargo safely from A to B, arriving where and when you need it, in the highest standards of condition and client expectation.

## Freight

### Motor City

#### Freight & packing to Detroit USA from the UK with a Russian Cargo Plane!

##### The Problem

A British manufacturer had responded to requests for re-design during manufacture of two large machines going to "Motor City" (Detroit). Unfortunately this had made the project late, but the US car industry doesn't like to wait – so it had to catch up and still be delivered on time. How to do this?

##### The Solution

Having realised that the only way was to hire a plane just for the job (as the machines were too big to fly on any normal aeroplane) we had to get agreement for the massive additional cost. If a car production line is slowed down, we were told that the cost would be much greater; so we had the go-ahead to hire a Russian Illushin 76! In the meantime the packing had to be quick and delivery to the aircraft timely. The photos show the loading operations at Stanstead Airport.

##### The Outcome

Relieved UK customer not having to pay damages for a late shipment and by keeping their US customer happy, secured another shipment which also went this way.
